

PRODUCT: Benzoic acid

Benzoic acid is a colorless crystalline solid and a simple aromatic carboxylic acid. The name is derived from gum benzoin, which was for a long time its only known source.

Application:

Benzoic acid is mainly consumed in the production of phenol by oxidative decarboxylation at 300–400 °C.

Items	Unit	Standards
Content	%	Min 99.0
The Acid Dissolving	-	Clear and Bright Liquid
Melting point	°C	121-123
