

PRODUCT : EPDM

EPDM is the abbreviated name for Ethylene Propylene Diene Monomer. In general industry, one may see other abbreviations or trade names. All of these are the same material as EPDM.

Application:

EPDM rubber is used in seals. EPDM is also used in glass-run channels, radiators, garden and appliance hose, tubing, pond liners, washers, belts, electrical insulation, vibrators, O-rings, solar panel heat collectors, and speaker cone surrounds.

Items	Unit	Standards
Mooney Viscosity 1+ 4(125 °C)	MU	66
Volatile Matter	%	Max 1
Ethylene Content	%	64.6
ENB Content	%	3.9
