

PRODUCT: N-butanol

N-butanol is a clear, colorless liquid that is flammable. It has a characteristic banana-like odor.

Application:

N-butanol is used to make other chemicals, as a solvent, or as an ingredient in formulated products such as cosmetics.

Items	Unit	Standards
Acidity as Acetic Acid	Wt %	0.005 max
Assay	Wt %	99.8 min
Auto ignition Temperature	°C	355
Boiling Point	°C	116-119
Color	Pt-Co	10 max
Critical Pressure	ATM	43.7
Critical Temperature	°C	289.8
Critical Volume	ml/g·mol	275
Electrical Resistance	Meg ohms	<0.2
